

Clean Claims, Before You Submit

A simple, four-step process — you only need to send your claims export.

1

Send your claims export

CSV or Excel — any clearinghouse or EHR export, any column names.

2

Automated validation runs

NPI check digit, CPT/HCPCS and ICD-10 format, modifiers, duplicates, dates, amounts.

3

You review the audit report

Every claim flagged READY or REJECTED, with the exact issue listed.

4

You submit clean claims

Fix the flagged few, resubmit with confidence — fewer denials, faster payment.
